Certification from Intel and Apple

As the pioneer of storage technology advance, Silicon Power's endeavors to optimize professionals'user experience and is honored to dpresent the brand new SSD-Thunder T11. The revolutionary palm drive utilizes Intel's Thunderbolt™ technology and is now officially certified by Intel® and Apple®.

Time is of the Essence

Silicon Power's Thunder T11 which enhances storage solution with Thunderbolt™ SuperSpeed I/O technology, is three times the speed of USB 3.0 HDD and delivers astonishing transfer rates up to Read/Write 380MB/340MB. For professionals who put great emphasis on speed performance, such as photographers, videographers, video gamers or businessmen.

Completely palm-sized, absolutely portable

Thunder T11 is not only the lightest but also the smallest Thunderbolt SSD on the market. Featuring extremely small and featherweight design, Thunder T11 is half the size of ordinary storage devices and only weights 65g.

Splendid and Silent

Thunder T11's Aluminum enclosure is designed to protect your files at a fraction of the weight but more importantly it offers an incredible cooling effect. In addition, Thunder T11 is entirely silent during the operation, which is particularly critical to users who work in a noise-sensitive environment.

Features

- Lightest and smallest Thunderbolt™ SSD on the market
- Ultra-fast I/O Speed up to 10Gbps
- Aluminum casing with incredible cooling system
- Ideal for professionals on the go
- Noise-free with the use of SSD
- Bus-powered design, without the need of additional power supply
- Mac OS friendly
